SQL QUESTIONS:

1.PATIENT RECORDS:

- 1)Select all patients who's procedure is done.
- 2)Select all patients who's procedure is pending.
- 3)Select all who's gender is female.
- 4)Select gender of all who are male.
- 5)Select who's ID is "75547".
- 6)Select record of who's last name is "BROLY".
- 7)Locate the diagnose "Paralysis".

2.MEDICAL_TRETMENTS:

- 1.SELECT ALL TREATMENT "SURGERY".
- 2.SELECT ALL TREATMENT "BEHAVIOURAL THERAPY".
- 3.SELECT ALL TREATMENTS "PHYSIO THERAPY".
- 4.SELECT THE EFFECT OF A DIAGNOSE THATS ABOVE "11".
- 5.SELECT ALL "PALATIVE CARE".
- 6.SELECT ALL DESCRPTIONS WITH "BOOST IMMUNE".
- 7.SELECT ALL DESCRIPTIONS WITH "PERMANENT PAIN".
- 11.SELECT ALL "NO" FROM IS AVAILABLE.
- 12.SELECT ALL "YES" FROM IS AVAILABLE.

3.BILLING_DATA:

- 1.SELECT ALL THE BILLING PRICES ABOVE 1200.45.
- 2.SELECT ALL BILLING PRICES BELOW 712.11.
- 3.SELECT THE HIGHEST BILLING PRICE.
- 4.SELECT THE LOWEST BILLING PRICE.
- 5.SHOW ALL DATES IN 2024 .
- 6.SHOW ALL DATES FOR 2025 .
- 7.SHOW THE HIGHEST NUMBER OF MEDICINE.
- 8.SHOW THE MOST AVAERAGE BILLING PRICE.
- 9.SHOW THE MOST AVAERAGE NUMBER OF MEDICINE.

4.DOCTOR INFORMATION:

- 1) Select all who's gender is female.

- 2) Select gender of all who's gender is male.
- 3)Change all spelling of "Pediattrition" to "Pediatrician".
- 4)Select all doctors who are Pediatrician.
- 5)Select all Doctors who are cardiologist.
- 6)Change all time formats"00:00"to ONE hour apart.
- 7)Show records of all changed DATA.
- 8)Display "Dr FRENZZY" record.
- 9)Display "Dr Drew" record.
- 10)Display "Dr MMARI" record.
- 11)Change "DR MMARI" to "DR MARI".

5.APPOINTMENT_SCHEDULE:

- 1.SELECT ALL "5" REVIEWS.
- 2.SELECT ALL "3" REVIEWS.
- 3.SELECT ALL REVIEWS BELOW "5".
- 4.SELECT ALL REVIEWS ABOVE "3".
- 5.SELECT ALL REVIEWS AT "5".
- 6.CHANGE ALL REVIEWS BELOW "3" TO "4".
- 7.CHANGE ALL 2 REVIEWS TO 3.

ERROR CHECKING :

The screenshot displays the MySQL Workbench interface. At the top, a 'Show query box' button is visible. Below it, a green status bar indicates a successful query: 'MySQL returned an empty result set (i.e. zero rows). (Query took 0.0219 seconds.)'. The query executed is 'CREATE DATABASE HOSPITAL_MANAGEMENT;'. Below the query, there are links for '[Edit inline]', '[Edit]', and '[Create PHP code]'. A blue error bar at the bottom of the query area displays the message: 'Error: #1046 No database selected'. The bottom section of the image shows the 'USE HOSPITAL MANAGEMENT' tab selected, with a similar green status bar indicating a successful query: 'MySQL returned an empty result set (i.e. zero rows). (Query took 0.0003 seconds.)'. The query executed is 'USE HOSPITAL_MANAGEMENT;'. Below this query, there are links for '[Edit inline]', '[Edit]', and '[Create PHP code]'. A blue error bar at the bottom of the query area displays the message: 'Error: #1046 No database selected'. The bottom toolbar includes buttons for 'Databases', 'SQL', 'Status', 'User accounts', 'Export', 'Import', 'Settings', 'Replication', 'Variables', and 'More'.

CREATE TABLE DOCTOR INFORMATION

CREATE TABLE MEDICAL TREATMENTS

CREATE TABLE BILLING DATA

CREATE TABLE APPOINTMENT SCHEDULES

INSERT INTO PATIENT RECORDS

INSERT INTO DOCTOR INFORMATION

INSERT INTO APPOINTMENT SCHEDULES

The screenshot shows a database management interface. On the left, a tree view displays the database structure, including 'hospital_management' and 'appointment_schedules'. The 'appointment_schedules' table is selected, showing its columns: 'APPOINTMENT_ID (PK)', 'BILLING_ID (FK)', 'DOCTOR_ID (FK)', 'PATIENT_ID (FK)', 'REVIEW (FK)', and 'TREATMENT_ID (FK)'. Below this, the 'billing_data' table is also visible, with columns: 'BILLING_DATE (date)', 'BILLING_ID (PK)', 'BILLING_PRICE (float)', 'DATE_OF_COLLECTION (date)', and 'NUMBER_OF_MEDICINE (int)'. The main window displays the 'APPOINTMENT_SCHEDULES' table with a query: 'SELECT * FROM `appointment_schedules`'. The table has columns: 'APPOINTMENT_ID', 'PATIENT_ID', 'DOCTOR_ID', 'TREATMENT_ID', 'BILLING_ID', and 'REVIEW'. The data is sorted by 'Name'. The table contains 10 rows of data. At the bottom, the SQL query is shown: 'SELECT * FROM `appointment_schedules`'.

SQL QUERIES:

DOCUMENTATION:

In the success of this group work we each played a role of conduction this project. With the help of our trusted themselves we managed to acheive this work and conquer all the diffculties we faced with deligence and agreement. As the group leader I Chantell Malepe had to ensure that every one was on the righty path of acvheiving the successes of the project. I took full responsibility in giving everybody a start up within the project. I would stay up till my latest at 12:33pm and assist anyone who had challeneges with having to be able to run their project. I also conducted an outline of who would do which work. I also handed out the outline of the work that they had to do. Even tho not all group memebbers where participant. I also had given everyone a personal deadline. I would force myself to be linient with who ever wanted to stay but had to deal with their vown personal lives up ahead. I always told them that "I am always available" .Of couse at some point temper was lost but at the end WE ACHEIVED IT ALL!!!!.

The challenges that we encountereed as the group are as follows:

GROUP MEMEBERS ARE AS FOLLOWS:

TEAM LEADER:CHANTELL MALEPE

MEMBERS:

*OFENTSE

*LEHLOHONOLO

*KULTOANO

*MONYAH

*LERATO

*Niso 02110751570812

--CHANTELL MALEPE;

Chantell Malepe had encountered challenges of having to make the date show accurate information on the table. I then had to the normal outline to the required outline needed. I also came across a challenge of having to insert information into the "FOREIGN KEY", but before all that came about i had an issue with having to make my Foreign key table run. I had to set the ending of the project which was the documentation due to how i new most about everyones uplifts and downflows within the project since every problem was taken down by me. I held

most of the meetings and the attendance number was not as consistent but the loyalty in the members was shown by few loyal people attending.

--KUTLOANO ;

Kutloano had faced a challenge with having to make some of the sql queries run. Hence she had to call the team leader to assist. When all that was in vain well, she had to rely on heading to lecturer Mr Owami to assist and got the help that she needed. I wasn't as fast as thought of, but the work was done eventually. To us it was more of a win than a loss or draw. She always attended every meeting no matter how tired.

--OFENTSE;

Ofentse took some time to adapt to the work requirements but then at the end succeeded. Although it was hard for the group leader to grab hold of him sometimes. He was very competent and met and exceeded the requirements of the project. He was stubborn at first to undergo proper research and get help, although he never needed it no matter how much the team leader was available. He handed in the work on time. He kept up with the deadlines and didn't disappoint.

--lehlohonolo;

Lehlohonolo was incapable of using his own laptop he had to rely on the team leader's laptop in her spare time. It was draining that she had to overwork herself to make sure that the work was handed over on time. Of course it was a decision and recommendation for him to go to the internet cafe but instead, the team leader offered to assist where needed. He exceeded what was required and never hesitated to accept a good challenge and was available most of the time to assist the team leader as required.

--Monyah;

Monyah was one of the independent members who had trouble maintaining the school work with her work. Living double lives was difficult, but every chance she got available late night she made extra sure that she did her part. She never relied on the leader for any help. She conquered her difficulties head on, and owned her part of the role. She never called late night to ask for help even though the team leader was always available. She wanted to test herself on how far she'd go.

--lerato;

Lerato made his first call to receive help and since there he was not available for calls not even for help. He wrote his work and submitted it late but at the end of the day it was done right. There was a point in time when he left his laptop behind and couldn't proceed with working. This improves the reason he had to miss the deadline and submit his work a lot more late than usual. His work exceeded above and beyond expectations needed. He was never stubborn and listened to instructions but he had a minor setback with him. He was very much capable of bringing himself to every meeting.

--Niso

Niso had the incapability to access his laptop hence making it hard for him to do the work on his own. He had to travel to one of our members' home to attain his work and submit it on time. He missed meetings but kept himself attached to his work over at the members' home. He gave great thanks to Kgotso for helping him achieve his team goal. If not so he wouldn't be mentioned in this very documentation.

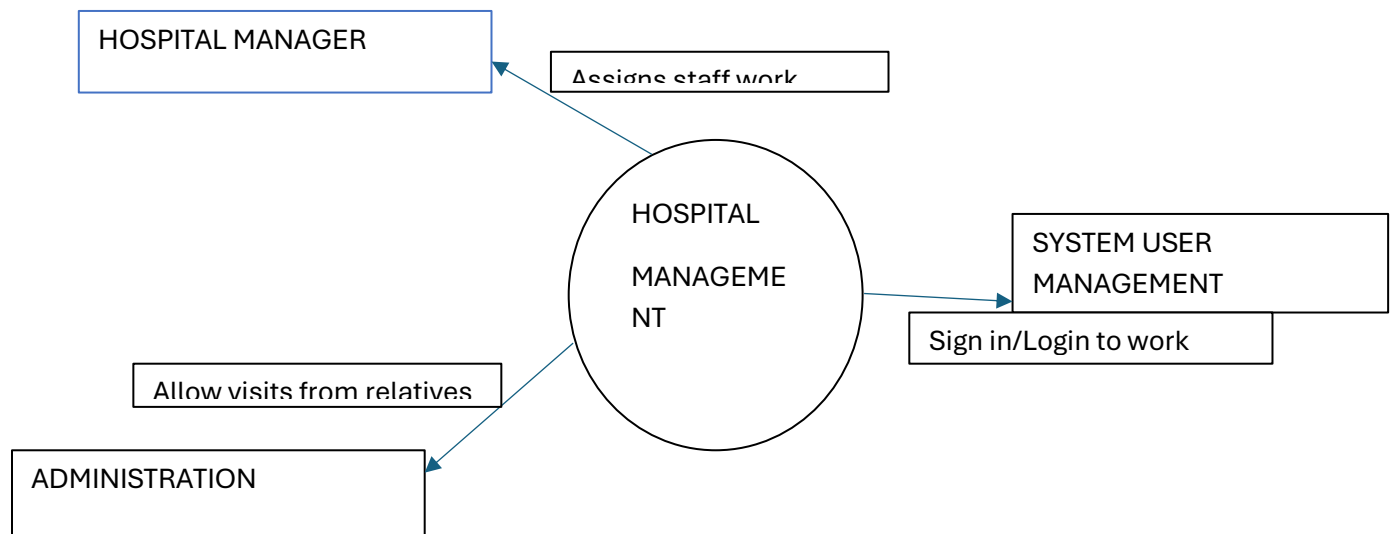

--Kgotso

Kgotso took his time and effort to create all DFD diagrams despite how long it took he was patient enough to do the work and finish on time. He also took his time to create the ERD Diagram and he created a rough draft before the final edition. He did have his tough times of trying to figure out where and what to do but at the end delivered what was asked of him to work on.

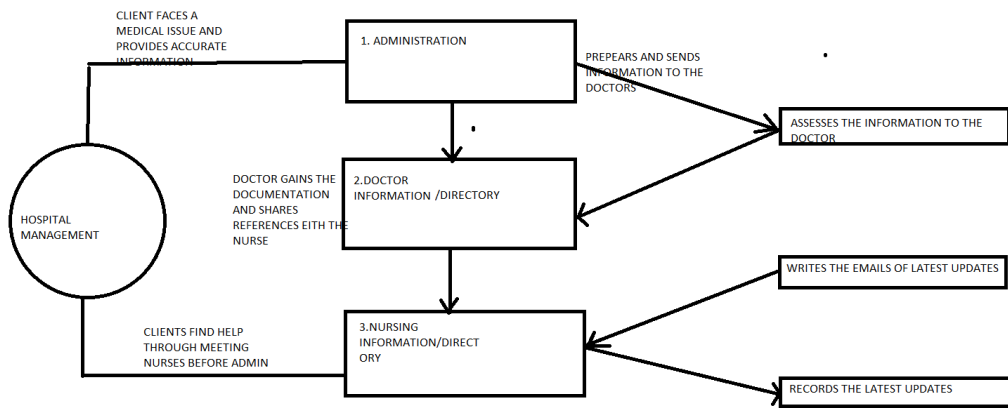

In conclusion all the members played a strict role handed by their group leader and excelled in it. This was all done despite the difficulties experienced whilst running the MYSQL codes. The members respected their group leader and did their job as instructed. They all kept their part of the bargain. This was all successful at the end.
